

**Movement Detector (PIR)** - detects movement and raises an alert, providing the 24 hour monitoring centre with the ability to audibly verify and record the presence of an intruder or alternatively detect for long periods of inactivity

**Smoke Detector** - the radio smoke detector raises an instant alarm call if it detects smoke, ensuring any potential fire situations are always responded to

**Bogus Caller Button** - fitted near a door, this discreet button can be used to call for assistance when a stranger requests entry into a home

**Flood Detector** - provides an early warning by raising an alert of potential flood situations in the home

**Temperature Extremes Sensor** - detects low, high or rapid rate of rise of temperature within a property and raises appropriate alert

**iVi Intelligent Pendant** - a small, lightweight device which will automatically detect if the wearer has fallen and raise the alarm, and which also provides them with a means of calling for help from anywhere in their home 24 hours a day

**MyAmie Pendant** - personal radio triggers that allow an alarm call to be raised within a radius of up to 50 metres from the Lifeline unit

**Pressure Mat** - 24 hour monitoring of inactivity or intruders, dependent on individual needs

**Bed/Chair Occupancy Sensor** - provides an early warning by alerting that the user has left their bed chair and not returned within a predetermined time period

**Enuresis Sensor** - placed between a mattress and a sheet, this sensor provides immediate warning on detection of moisture to allow effective action to be taken

**CareAssist** - a portable telecare alarm for onsite carers that can receive telecare alerts and display not only the type of sensor activated but also either the location of the sensor or the name of the person the sensor has been assigned to

**Epilepsy Sensor** - provides warning of epileptic attack whilst in bed

**Minuet Watch** - an alarm button and quality watch combined encourages telecare users to wear their personal trigger throughout the day

**Pillow Alert** - vibrates to alert a sleeping user to a potentially dangerous situation e.g. smoke alarm

**Lifeline Vi home unit** - receives alerts from sensors placed around the home and notifies a monitoring centre if it detects a problem

**Carbon Monoxide Detector** - warns of dangerous CO levels within a property allowing the appropriate action to be taken

**Medication Reminder/Dispenser** - provides effective solutions to support medication compliance. Can be used to provide other reminders if required

**Flashing Beacon** - offers both visual and loud audible signals when a sensor or telephone is activated, ideal for the hard of hearing

**Vibby** - This advanced fall detector will automatically raise an alert if the user has fallen

**Universal Sensor** - enables wired devices to transmit a signal to a lifeline home unit.

**Jelly Bean** - A trigger that enables users with limited motor control to activate the lifeline unit.

**Lifeline GSM** - Deployed on a mobile phone network. A simple solution when no landline is available.
